WHY DO SOME VOLCANOES EXPLODE?

4th graders are off to an explosive start! We studied the past and present pattern of where volcanoes exist on the earth. Using a world map to plot volcano locations helped us discover a "Ring of Fire" pattern around the Pacific Ocean.

Next, we investigated how the differences in lava types explain differences in the shape and eruption patterns among volcanoes. Our experiment, Bubble Trouble, compared two different types of 'lava' - thin and thick. We discovered why volcanoes have different shapes and how the type of lava explains why some volcanoes explode.

COVID-19

QUICK REFERENCE

WATCH FOR SYMPTOMS

Symptoms may appear as early as the day after exposure, or as late as 10 days after exposure. Common signs and symptoms of COVID-19 include:

- Congestion or runny nose
- Sore/scratchy throat
- Cough
- Fatigue
- New loss of taste, smell or appetite
- Fever or chills
- Headache, muscle, body aches
- Difficulty breathing
- Nausea or vomiting
- Diarrhea

IF YOU TEST POSITIVE, ISOLATE (VACCINATED OR NOT)

Stay at home for a full 5 days after symptoms start/positive test (day 0 is positive test or symptom onset). Keep your household safe: wear a high-quality mask and stay in a separate room. Rest and stay hydrated. Manage symptoms using over-the-counter medications. Stay in touch with your doctor. Time-sensitive treatments are available to decrease the severity/duration of the virus. You may leave isolation on day 6 if your symptoms are improving and you wear a mask around others, including at home, through the end of day 10.

SEEK EMERGENCY MEDICAL ATTENTION IF YOU HAVE:

- Trouble breathing
- Persistent chest pain or pressure
- New confusion, weakness
- Inability to wake or stay awake
- Pale, gray, or blue-colored skin, lips, or nail beds, depending on skin tone

IF YOU HAVE BEEN EXPOSED TO COVID

Wear a mask any time you are around others inside your home or indoors in public for the 10 days following your last day of exposure. (Consider your last date of exposure as day 0.) Even if asymptomatic, take a rapid antigen or PCR test on day 6 or later. Do not go anywhere where you cannot wear a mask and take precautions around others who may get very sick from COVID-19. If you develop symptoms at any time, stay home until you feel better and take a rapid antigen or PCR test. If symptoms persist, repeat rapid tests 48 hrs apart.
